

# Where is the Danger?

A pony is always on the lookout for danger, but what is dangerous for a pony is more to do with being eaten than anything else. When you're with your pony there are lots of things that you need to think about to stay safe.

Can you spot any danger in these pictures?

There are all sorts of things which can affect you and your pony. Some ponies will worry about big lorries or small, yapping dogs. If it's windy enough to fly a kite, then it's probably too windy for your pony to hear properly and he might worry about that. Or his saddle might be uncomfortable or his bit too small.

Look at these pictures from your pony's point of view. They will give you an idea of some of the things that you might need to look out for. Being able to understand when your pony is worried will help you to stay safer.

# What's Important to Your Pony?

I love this new tack box. Have I got everything I need to groom Fairy?

I like the smell of this, is it for tea?

You might have other things that are important to you, like winning a rosette at a show or buying a new tack box.

The most important things for a pony are staying safe from predators and finding things to eat.
